- Customer Service
- Basic Accounting & Record-Keeping

EDUCATIONAL BACKGROUND

College, Caraga State University, Butuan Agusan del Norte, Philippines

DATE

Bachelor of Science in Information Systems

2021-Present

PROJECT PORTFOLIO

Name	Description
DORM QUEST	An app designed to help users find available dormitories and boarding houses using Google Maps. The app likely includes features like real-time availability, pricing, location details, and user reviews to assist renters in making informed decisions.
CSU-CRADS (College Red Cross Automated Data Scanner)	The system simplifies student ID management by using API integration to scan IDs or QR codes, retrieving personal records from the university's database for real-time verification. It prevents duplicate entries and improves efficiency in student registration, attendance tracking, and record-keeping, streamlining administrative tasks.
RVC Pet Care	The RVC Pet Care Online Booking Application offers a user-friendly interface for easy appointment booking, making pet care services more accessible, especially for pet owners in remote areas. It ensures a smooth booking experience with secure payment options.
WIFID (Wireless Improvised Flood Indicator Device)	WIFID (Wireless Improvised Flood Indicator Device) utilizes wireless technology and able to detect rising water levels during heavy storm that cause floods. Provides real-time monitoring for timely evacuation and response, empowering communities with an efficient tool in addressing their problem
Personal Portfolio	To showcases my individual's skills, accomplishments, and work samples to demonstrate my expertise and potential.
